Hi CJ,

Always nice to talk with you! The hurrier I go the behinder I get (Amish saying)

There are 5 pix attached. Will send more another time. WE attended and sponsored a number of fly-in back in the 1990s. One pix is of Len Saxild whose untimely fatal accident led to the initial shoulder harness program.

Ted Mauger is seen on a St Lawrence Seaway tour as part of the Alexandria Bay, NY fly-in sponsored by Ed Mason 19Jun1993

Pete & I are pictured at the ICS big fly-in at Louisville, KY 1992 We attended on our way home having flown across the country to Arlington WA, Newport, CA and many places in between for 3+ weeks

Also 2 from Apollo Flying Club. The replacement Cherokee 180 is still THE club plane on the ramp at ASH.

Cliff's last name is Coy up at Highgate VT Airport. He has the tooling for the Australian horn upgrade and has done several. The twin Comanches he & his Dad tended to were at another location, mid west? Heather Mannings was working the Border Air shop as of last fall.

**To my recollection the NE Comanche tribe did not have their own by-laws.** Eric Townsend from Bethlehem PA was active back in the 1990s.

Sorry to be brief, sleep required :) Nancy Z
